Not illustrated. 1894 Excerpt: . . . SECTION ON GENERAL MEDICINE. BACTERIOLOGICAL ASPECTS OF CROUPOUS PNEUMONIA. H. A. WEST, M. D. , Professor of General and Clinical Medicine, University of Texas. GALVESTON. I do not propose to undertake upon this occasion, however profitable it might be, to discuss in detail the subject of croupous pneumonia from a bacteriological point of view, but rather, after mentioning some of the more salient points which have been established in recent years in regard to the infective cause of this disease, to deduce some practical conclusions concerning its complications, prevention and treatment. Before proceeding with this imperfect statement of the nature and peculiarities of the infections agent in croupous pneumonia, it will be well to fix in our minds the meaning of the terms infection, infectious disease, contagium, contagion, etc. , as at present understood. We must get rid of the hazy and indefinite ideas which have heretofore prevailed, and have a clear conception of what is meant by these terms before we can apply them intelligently to any particular disease. Dr. T. Mitchel Prudden has recently (1) so clearly expressed the modern views upon this subject that you will excuse me for quoting him: Those who can justly speak most authoritatively in this matter are agreed that in the light of to-day an infectivs disease is one which is caused by the invasion and reproduction within the body of pathogenic micro-organisms. Infection is the condition produced by such invasion. The word contagions no longer...
