Pub Date :2007-10-01 Publisher: People's Health Publishing House in Europe, the United States and other developed countries and regions are still facing important challenges of sudden cardiac death. The main difficulty lies in two aspects. first, how to find dangerous individuals before ventricular tachycardia or cardiac arrest events; two patients quickly treatment is how the vicious incident occurred outside the hospital. To highlight these issues, the European Society of Cardiology has developed the guide. Joint Writing Committee of the American College of Cardiology, the American Heart Association, the European Society of Cardiology and the Heart Rhythm Society, for the evaluation and treatment of ventricular arrhythmias and cardiac arrest patients formulate another set of guidelines for ventricular tachycardia and The danger of sudden cardiac death in patients with various heart diseases, and further processing. The book as part of the series of the European Society of Cardiology (ESC) guidelines provide the background knowledge of the relevant guidelines, but focuses on the discourse cardiac arrest from the basis of experimental research to clinical trials awareness of progress. This book is also...
